The School Upgrade Program and Comprehensive Modernization Projects

Presentation to the Budget, Facilities & Audit Committee
April 9, 2015
LAUSD Facilities Realities

- Almost Half of the District’s Buildings were Constructed at Least 50 Years Ago

- Nearly 800 of the Buildings Were Constructed More Than 75 Years Ago

- The General Fund Allocation for Routine Repair and General Maintenance has Been Reduced by Over 50% Between 2007 and 2014 --This Significant Decrease Makes it Challenging to Keep our Schools in a State of Good Repair
LAUSD Facilities Realities

Continued

- Legacy School Facilities Do Not Meet Current Building Codes

- Legacy School Facilities Do Not Support Current Instructional Vision

- Operational Funding Does Not Keep Up With Capital Need

- It is Estimated that the District Would Need Approximately 10 Times More Funding than is Available to Address All the Capital Needs of All of Our Schools
The School Upgrade Program

Overview

- The Primary Focus of the School Upgrade Program is to Upgrade Legacy School Facilities
  - Prior Phase of Bond Program Focused on Constructing New School Facilities to Eliminate Use of Multi-Track Calendars and Involuntary Busing

- Under the Program, the District will Modernize, Build and Repair School Facilities to Improve Student Health, Safety, and Educational Quality

- Board Program Goals:
  - Schools Should be Physically Safe and Secure
  - School Building Systems Should be Sound and Efficient
  - School Facilities Should Align with Instructional Requirements and Vision

- Program Currently Valued at $7,852,900,000

- 18 Categories of Need/Priorities with Associated Funding Sources
# School Upgrade Program

## Spending Targets

<table>
<thead>

</table>
Comprehensive Modernization Projects

- Approximately $4 Billion Spending Target to Comprehensively Modernize Legacy School Sites
- Comprehensive Modernization Projects May Include Constructing New Buildings, Reconfiguring Existing Facilities, and/or Upgrading Existing Spaces
- Depending on Specific Site Conditions, Comprehensive Modernization Projects May Address Some or All of the Following Conditions:
  - Earthquake Safety
  - Failing Building Equipment and Systems
  - Physical Safety and Security
  - Inadequate General and Specialized Classrooms
  - Fire-Life Safety
  - Current Building Codes
  - Accessibility
  - Dilapidated Portable Buildings
  - Inadequate Core Facilities and Play Space
Comprehensive Modernization Projects
Continued

- Projects Will Address the Facility Conditions that Must be Improved to Ensure Students Continue to be Provided with a Safe and Healthy Learning Environment, and that Facilities do not Impact the School’s Ability to Deliver the Instructional Program or Operate

- The Need to Update Our Schools Far Exceeds Available Funding, as Such, it is Necessary to Develop a Methodology for Prioritizing School Sites to Receive Comprehensive Modernizations
Prioritizing Major Modernization Projects

*What Was the Process?*

- Assess the Conditions of Our School Facilities
  - Completed Capital Needs Assessment and Master Planning Effort
  - Engaged Stakeholders at Individual School Sites
  - Undertook a Facilities Condition Assessment
  - Throughout the Development of the School-Site Surveys and Master Plans, More than 750 Meetings Were Held with School-Site Stakeholders

- Collect and Analyze Data

- Engage Experts and Stakeholders
  - Convened Internal Committees to Provide Strategic Guidance
  - Convened External Technical Committee to Validate Process
  - Solicited Feedback from Various Stakeholders in Community Meetings
  - Convened/Convening Roundtable to Provide Focused Feedback
  - Developed and Vetted Categories of Data and Weights
Internal and External Committees

*Strategic Guidance & Direction and Validation from External Experts*

- **Internal Committee Provided Strategic Guidance**
  - Maureen Diekmann -- Executive Director, Early Childhood Education
  - Mark Hovatter -- Chief Facilities Executive
  - Michelle King -- Chief Deputy Superintendent
  - Rowena Lagrossa -- Executive Director, Parent Community Student Services Branch
  - Byron Maltez -- Instructional Area Superintendent, ESC North
  - Megan Reilly -- Chief Financial Officer
  - Bruce Takeguma -- Director of School Management Services
  - Edgar Zazueta -- Director of External Affairs

- **External Technical Committee Validated Process**
  - Ronni Ephraim -- 2U/LAUSD (Retired)
  - Mary Filardo -- 21st Century School Fund
  - Gary Lee Moore -- L.A. Department Public Works, Bureau of Engineering
  - Connie Rice -- Advancement Project
  - Miguel Santana -- LA City Administrative Officer
  - Richard Slawson -- LA/OC Building & Construction Trades Council (Retired)
  - Chester Widom -- Division of the State Architect
The Majority of Participants Believe the Physical Conditions Related to Safety Were the Most Important Considerations When Prioritizing Comprehensive Modernization Projects; Consistent with the Methodology Utilized to Identify the First 11 School Sites with the Worst Physical Conditions.
Identifying School Sites

Comprehensive Modernization Projects

School Sites are Identified Based on the Following 10 Categories, with the Health and Safety of Our School Facilities Being the Top Priority:

- The Physical Condition of a School’s Buildings & Outdoor Areas -- Identified by the 10-Year Facilities Condition Index (FCI), a Comparative Indicator of the Relative Condition of a School’s Facilities in Relation to the Current Replacement Value. Where applicable, the FCI score is adjusted to reflect any projects underway and the improved conditions that will be provided.

- The Seismic Risk Factor of a School’s Buildings -- Identified Using the Federal Emergency Management Agency’s Hazus-MH Model for Determining the Probability of Failure Based on the Predicted Earthquake Magnitude Generated by Specific Faults, Year of Construction, Type of Construction, Number of Stories, and Code and Construction Quality at the Time of Construction.

- Size of Food Service Facility, Multi-Purpose Room/Auditorium, and Library -- Determined by an Assessment of the Difference Between the Size of the Core Facility and the Design Standard for Construction of a New Facility.

- Size of Play Space -- Determined by an Assessment of the Difference Between the Size of a School’s Play Area and the Size Recommended Under the Rodriguez Consent Decree.

- Percentage of Classrooms in Portable Buildings -- Number of Classrooms in Portable Buildings Versus Number of Classrooms in Permanent Buildings.

- Adequacy of Controlled Public Access Point -- Assessment of Whether a Campus Has a Secured Single Point of Entry or an Intercom/Camera System that Controls Visitor Access to the School Site.

- Site Density -- Determined by an Examination of the Amount of Square Footage Per Student at a School Site.

</table>
Scoring Methodology/Formula

The “Weighted Sum” Method

\[ w_1(Score_1) + w_2(Score_2) + w_3(Score_3) \ldots = \text{Total Site Score} \]

The Higher the Score = the Greater the Need for Facilities Improvements and a Comprehensive Modernization Project
Scoring Methodology/Formula

Scoring of Datasets

- Each Data-Set is in Different Units
- Each Data-Set Has Different Yard Sticks
- Ideally, Comparison is Done on a Scale of 0-100

Goal:

“Oranges to Oranges”

Scoring
Scoring Methodology/Formula

Data Distribution

Below the Average or Benchmark

Above the Average or Benchmark
**Scoring Methodology/Formula**

*How is the Data in Each Category Scored?*

---

**START**

Raw Score

Z-Score  
(Goal: Normalize)

T-Score  
(Goal: Standardized)

---

Raw Score is the raw data point per school site.

For example: High School A has 8 acres of play acreage.

---

\[ w_1(Score_1) + w_2(Score_2) + w_3(Score_3) \ldots = \text{Total Site Score} \]
Scoring Methodology/Formula
How is the Data in Each Category Scored?

A “Z Score” is the Measurement of the Gap Between a Raw Data and the Benchmark or Average Used for Comparison, Expressed in Standard Deviations

START

Raw Score

Z-Score
( Goal: Normalize )

T-Score
( Goal: Standardized )

\[ w_1(Score_1) + w_2(Score_2) + w_3(Score_3) \ldots = \text{Total Site Score} \]
**Scoring Methodology/Formula**

*How is the Data in Each Category Scored?*

---

**START**

- **Raw Score**

- **Z-Score** *(Goal: Normalize)*

- **T-Score** *(Goal: Standardized)*

---

T-Score is the Conversion of the Z-Score for Ease of Comparison on a Larger Scale 0 to 100

\[
T\text{-Score} = (Z\text{-Score}) \times 10 + 50
\]

\[
(-0.30) \times 10 + 50 = 46.97
\]

Need to reverse score to reflect ‘worse’

\[
100 - 46.97 = \text{53.03 T-Score}
\]

\[
w_1(Score_1) + w_2(Score_2) + w_3(Score_3) \ldots \ldots = \text{Total Site Score}
\]
Prioritizing Comprehensive Modernization Projects

Key Points

- School Sites that have Data for all 10 Categories have been Scored and Weighted
  - Legacy Secondary School Sites were Scored and Weighted Based on Data and Conditions as of December 2014
  - Legacy Elementary School Sites FCA Underway -- Anticipate FCI Data in Fall 2015

- Scores in Each of the Categories are Calculated Based on a Standard Deviation From a Norm
  - As Data from Legacy Elementary School Sites is Added to the Model, Legacy Secondary School Site’s Scores Within Each Category Will Likely Change

- A Prioritized List of all Legacy School Sites Will be Developed Based on the Same Assessment of the 10 Categories That Led to the Identification of the First 11 School Sites
  - A Complete List of All Legacy School Sites with Site Vitals, Scores and Weighted Scores Will be Presented After the Elementary School Data is Available and Incorporated into the Model
First 11 School Sites
Schools with Critical Physical Conditions

- North Hollywood High School
- Huntington Park High School
- Grant High School
- Sherman Oaks Center for Enriched Studies Magnet
- Roosevelt High School
- Polytechnic High School
- Cleveland High School
- Burroughs Middle School
- Venice High School
- San Pedro High School
- Jefferson High School
11 Comprehensive Modernization Projects

Development of Project Definitions

- Staff Anticipates Beginning to Bring Project Definition Proposals to the BOC and Board in the Fall of 2015

- Due Diligence and Pre-Design Activities Are Underway
  - Stakeholder Engagement
  - Site Survey and Analysis
  - Space Programming
  - Educational Programming
  - Seismic Evaluations
  - Geotechnical Investigations
  - Preliminary Environmental Studies

- Above Activities are Necessary to Develop Well-Defined Project Budgets, Scopes and Schedules
11 Comprehensive Modernization Projects
Where are We?

- Project Teams Have Met with All Principals, Educational Service Center Leadership and Complex Project Managers
  - Requested Each Principal and ESC to Prepare the Educational Program for Use by Facilities Team
  - Discussed Structure for School Site Stakeholder Engagement

- Project Teams are Negotiating with Architects
  - Preliminary Site Analysis Pending
    - Investigate and Evaluate Facilities
    - Analyze Conditions and Needs
    - Propose and Develop Ideas/Options for the Comprehensive Modernization Project at Each Site

- Project Team Goal is to Hold the First Community Meeting at Each School Site Before Summer Break
Questions???
